

POT Matchmaker — Launch Video Brief for Sithum

Date: 2026-05-14 **From:** Shaun **For:** Sithum (production) **Status:** Screenshots already delivered separately

Brand line: “Find your 5. Not your 500.”

1. Problem

Web3 conferences are an 18-hour blur of business cards and “let’s connect on LinkedIn.”

2,500 decision-makers in one room over two days. You leave with a stack of contacts and zero real conversations. The people you actually needed to meet — the LP who would have invested, the founder who fits your thesis, the regulator who clears your path — they were there. You just never found them.

Filters and search don’t fix it. You don’t know who you’re looking for until after you’ve met them.

2. Product Intro

POT Matchmaker — the AI built into Proof of Talk 2026.

It reads every registered attendee’s profile, infers what each person actually needs from the conference, and produces a personalised shortlist of the 5–10 people worth your time. It’s not a generic event app bolted on. It was built for this conference, for this audience.

\$18 trillion in assets. 2,500 decision-makers. One AI concierge.

3. Use Cases / Features

(maps to the screenshots already with Sithum)

Feature	What it does in the video
My Matches	Ranked list of who to meet, with a one-line reason for each. Not “you both work in DeFi” — actual complementarity (“She raises funds from the LPs you’re trying to reach.”)
AI Concierge	Chat with it like a smart colleague. Ask “Who should I meet?” or “Prep me for my meeting with X.” It answers in plain English, sources cited.

Feature	What it does in the video
Profile auto-drafting	Profile incomplete? The AI offers to draft your conference goals, your target companies, your interests — based on what it already knows about you. One tap and your profile is sharper, your matches improve.
Mutual match alerts	When someone you picked picks you back, the app tells you — and surfaces the time slots you're both free.
Free-slot booking	One tap to book a meeting at a time that works for both of you. No back-and-forth.
Magic link	No password, no signup friction. Your meetings open from a single link in your email.

4. Impact / Resolution

Walk out of Paris with **5 conversations that move your business forward** — not 50 contacts that go cold by Monday.

- Investors find the founders in their thesis.
- Founders find the LPs who'd actually invest.
- Regulators find the builders they need to talk to.
- Sponsors find the buyers they came to meet.

No keyword filters. No scrolling through 2,500 profiles. The AI did the reading for you. You just show up.

5. CTA

If you have a ticket: Check your inbox. Your matches are live.

If you don't: proofoftalk.io — Louvre Palace, Paris. June 2–3.

Reference assets

- Brand line (must appear as the closing on-screen text): **"Find your 5. Not your 500."**
- URL (must appear in the final card): **proofoftalk.io** (or **meet.prooftalk.io** for ticket-holders — *Sithum to choose which fits the cut*)
- Audience: existing ticket-holders (~436) + prospective Web3 decision-makers
- Channels: LinkedIn primary, X + IG Reels secondary

- Tone: premium, measured, confident. Not hype-bro, not corporate. Louvre Palace energy.

What Sithum has from us

- This brief
- Product screenshots (already delivered)
- Brand line + URL
- Audience + tone

What we still need from Sithum

- A first cut in Sithum's preferred format
- Aspect-ratio exports: 1:1 (LinkedIn feed), 9:16 (Reels / X mobile), 16:9 (archive + decks)
- Source files in case we need to update copy or swap a screenshot before launch
