Proof Of Talk

The Grid potential work outline

The Grid

Refresher…

The Goal is that The Grid is building a new type of company identity experience with an org first view.

Attendees want to understand the org, gauge whether it could be interesting before meeting.

We are building that.

Why?

Less “what do you do”
More: “how could we work together"

Low quality connections suck.

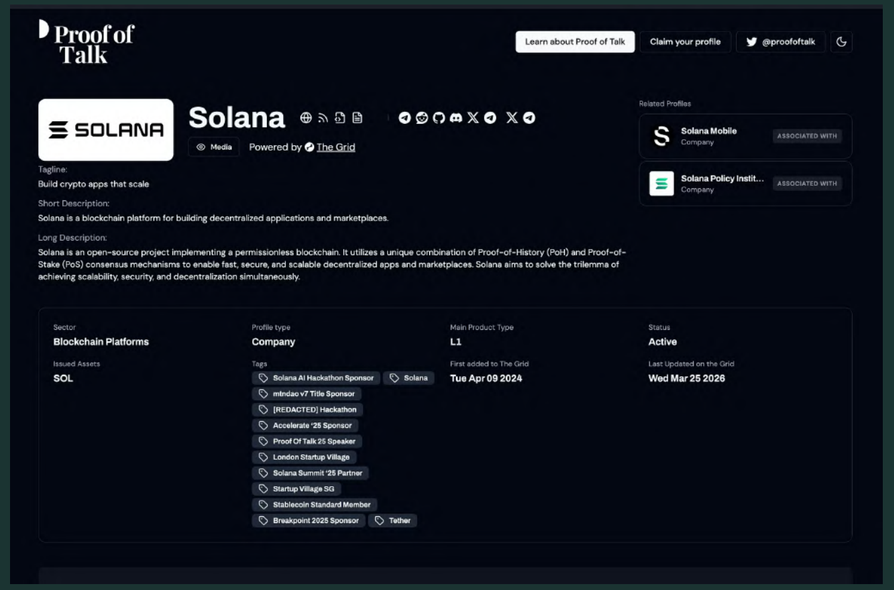
The directory

This is the ‘logged out’ view that people see. Key to learning about orgs that people may not know AND sponsor public engagement

Everything uses The Grid API. We can also talk about integrating the data onto the main POT site, depending on implementation

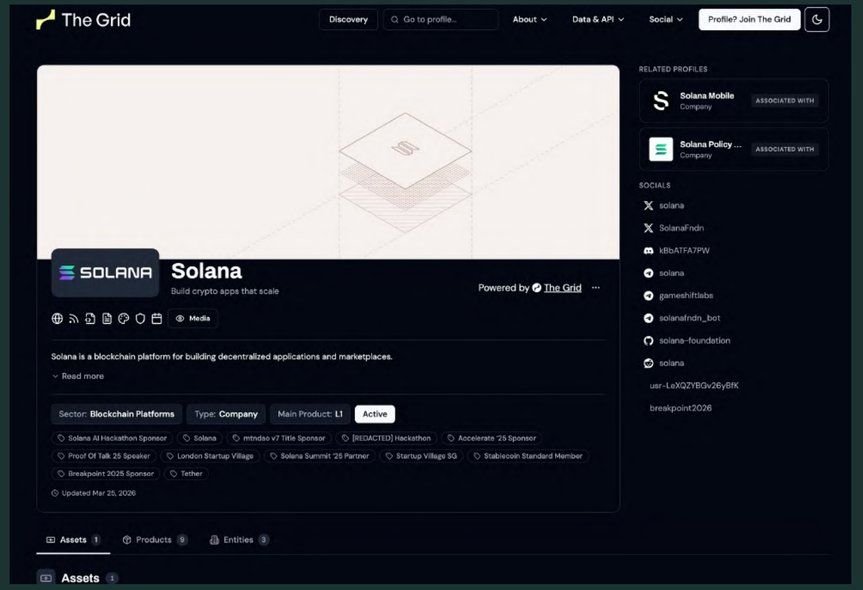
Current POT directory stats:

OLD - Current



Upgrade

New - Will be updated in April… exact date TBD



See thegrid.id

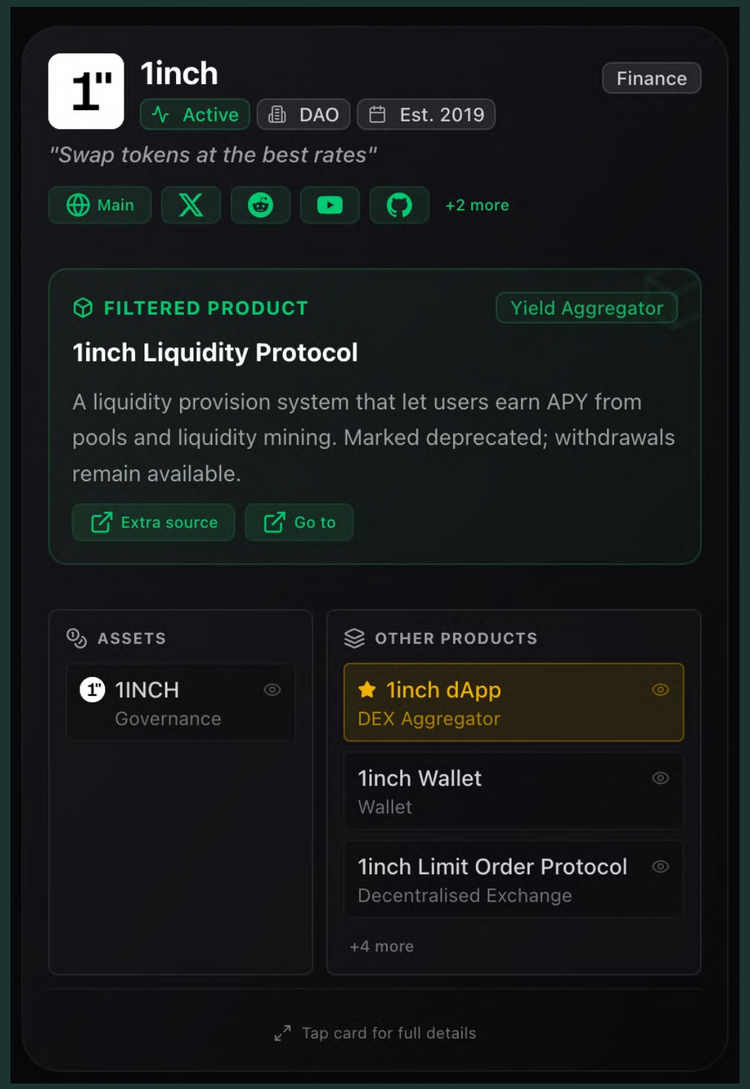
The Grid Profiles

Our data is used to help people understand “what do you work on”, which is quicker than a chat.

This should lead to higher quality conversations.

For us to make this in POT branding, would be easy as a basis point for LOGGED in users:
grid.thegrid.id <- mainly this one
grid.thegrid.id/board

However given users will have Rhuna tickets? What should we do?



So what does our data help with?

More Context to AI, quicker than a web search

Year round directory - ***Already live***

Support for orgs to ‘signal intent’ about what they do, also based on what they do….

Analytics collection across public + potenially app based interactions

Quick Wins (High Impact, Low Effort)

- Intent-Based Matching
- QR Business Card Exchange
- Year-Round Directory
- Pre-Event Warm-Up Threads
- Investor Heatmap

Core Features (High Impact, Medium Effort)

- Smart Match Score
- AI Concierge Chat
- Meeting Scheduler with Smart Slots
- Matchmaking Lunch Algorithm
- Session Matchmaking
- AI Meeting Prep Briefs
- Relationship CRM
- Deal Tracker
- Sponsor Analytics Dashboard

Moon Shots (High Impact, High Effort)

- Real-Time Proximity Alerts
- Deal Flow Board
- PoT Reputation Score
- Live Ecosystem Map

What could we build?

All things our data can be used for:

'Smart Match'

- What are you looking for?

Intent-Based Matching:

- Orgs when signing up signal intent - raising/ investing/ ect

AI Concierge Chat

- Some form of chat bot, loaded with ecosystem data + session data + more

Profile Analytics

- We are upgrading our profile analytics to be based on PostHog.
- Others can also use PostHog to send us analytics events
- We can then synicate into a 'profile dashboard' to be shared during / after the event

Booth QR codes:

- Points to the directory, either in app or public site.

What are we NOT going to build?

Warm Path Finder - Meh

- This requires alot of assumptions and probs may give bad results

Live Ecosystem Map +
Real-Time Proximity Alerts - No

- This requires quite some complex hardware + software components.
- Not The Grid's focus.
- Could be a tech package from someone else

Session Info + Matchmaking - No.

- We do not want to map sessions inside The Grid

Person to Person networking - Maybe

- We want to have org-org networking. We want this to be a fit for events, but it may not be? Have to validate.
- We have a work around that can setup Telegram groups between 2 people as they sign up on The Grid.

Meeting setup in rooms / tables - Maybe

- We could do this, but most of our future business will be about networking online. Which is different than 'lets meet at this pillar or table'

The Grid & Rhuna

There is an opportunity to have both apps work together.

The Grid could build the networking part, and still wants to tbh. But given the timeline and the context, it may be better for each to focus on their strong suit.

Rhuna focuses on ticketing + personal info and imports org from The Grid.

Marketing teams get best of both worlds.

Feature	The Grid	Rhuna
Ticketing	N/A	Core ticketing system
Org info	Our core focus	Read from the grid
Session Info	N/A	Core part of events
Website directory	Our core focus	N/A
Inter personal event networking	Org networking, post event	Onsite person networking
All the AI stuff	Provide good data + AI tooling	Can use The Grids data

The Sponsor Flow

Sponsors onboarding

POT

- Removes ‘branding questions’ from forms
- Focuses onboarding on “what you want to get out of it”

The Grid

- 1 marketing team memeber sign up to claim profile on The Grid, as part of the onboarding process
- Gets insights into Analytics on their profile

Rhuna

- Sponsor team members signup for tickets (as expected anyway?)
- ORG data is read from the Grid

The Speaker Flow

Speaker onboaridng

POT

- Focused on scheduling / speaker things

Rhuna

- Speak signup for tickets (as expected anyway?)
- ORG data is read from the Grid

Optional:
The Grid

- 1 marketing team memeber sign up to claim profile on The Grid, as part of the onboarding process
- Gets insights into Analytics on their profile

The Speaker Flow

Attendee onboaridng

Rhuna

- Speak signup for tickets (as expected anyway?)
- ORG data is read from the Grid

Optional: The Grid

- 1 marketing team memeber sign up to claim profile on The Grid, as part of the onboarding process
- Gets insights into Analytics on their profile
